Dementia Home Treatment Team Values

A clear framework to provide support to the local population to assist with living with Dementia

Signpost for appropriate support to offer assessments for carers and families

To ensure people with dementia are treated with dignity and respect, by staff who are skilled and competent

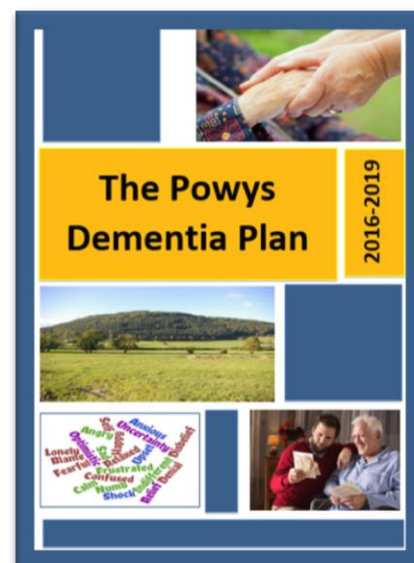

To improve the care of people with dementia in their own environment

Support care homes in Powys to reduce the need to move away from familiarity

Dementia Home Treatment Team - DHTT

In June 2016, The Dementia Home Treatment Team was formed to provide a community based Dementia Assessment Service for the people of Montgomeryshire

The team comprises: a Consultant Psychiatrist, Team Manager, qualified Mental Health Nurses, skilled Health Care Support Workers and an Occupational Therapist

Access to the Dementia Home Treatment Team is via a triage system. This is operated each day from 07.30 hrs to 20.30 hrs including weekends and bank holidays

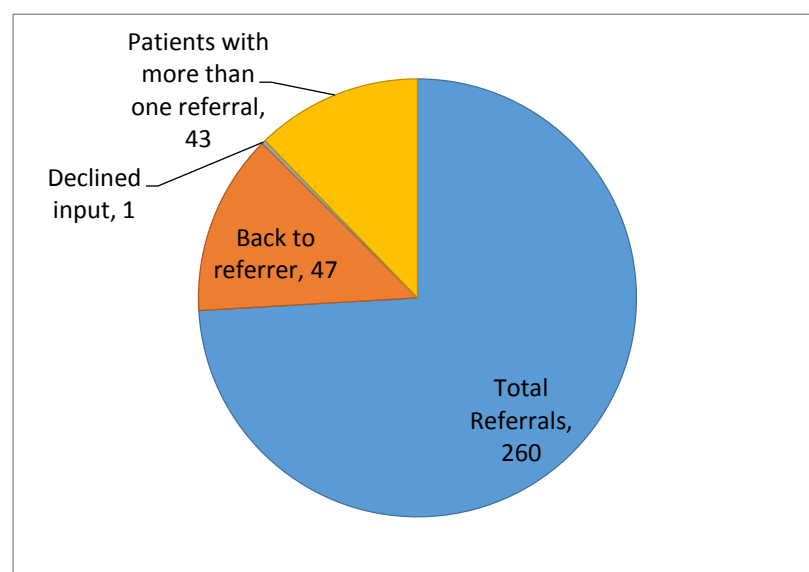

The service is available to people who are living with a dementia who wish to remain at home

Referrals can be made from the Community MH Teams, GPs, Allied Health professionals, social services, nursing and residential homes, carers and family members

Individuals accessing the service may be:

- In need of a period of intense assessment
- At risk in their immediate setting
- Facing a breakdown of care support as a result of the impact of dementia

Graph showing referrals since June 2016

Six themes at the heart of everything we do

Theme 1:	Theme 2:	Theme 3:	Theme 4:	Theme 5:	Theme 6:
Caring with humanity, dignity, kindness and compassion	Providing safe, effective, harm-free care	Listening to patients & improving the way we work, securing a reputation for excellence	Developing confident, ambitious, inspirational leaders	Working with partners for the benefit of patients	Questioning, analytical, empowered nursing & midwifery workforce
